

HUMERUS

Diagnostic/Treatment Recommendations:

- Please use this form for lesions of the humerus; use the elbow or shoulder form for muscle or tendon problems

Referral Guidelines:

- Please obtain AP/Lateral views of the humerus before referral
- Referrals for fractures are to be made through established procedures. Obtain the radiograph and your encounter form and CALL the orthopedic surgeon on-call to review films.
- Fractures should be splinted
- Tumors, and other pathologic lesions of the humerus can be referred by calling physician to physician.
