

## COLON CANCER FOLLOW-UP GUIDELINES

- Follow up will be done by the Surgery department, for the first 2 years and thereafter whenever a colonoscopy is needed (year 5 and every 3 years thereafter). Annual follow-up between surgical visits should be performed by the patients Primary Care Provider (PCP)
- Detection of recurrent colon cancer is sometimes treatable and may, in a few instances, improve survival. Colon cancer patients remain at increased risk for developing new primary colon cancers throughout their lives.
- If the patient had a curative resection the follow-up is as follows

### Colon Cancer Follow Schedule

	6 months	12 months	18 months	24 months	3 years	4 years	5 years	Every 3 years after year 5
<b>Stage I</b>	Colonoscopy*	Colonoscopy		Colonoscopy			Colonoscopy	Colonoscopy
		Physical Exam, CBC, CMP, CXR		Physical Exam, CBC, CMP, CXR	Physical Exam, CBC, CMP, CXR	Physical Exam, CBC, CMP, CXR	Physical Exam, CBC, CMP, CXR	
<b>Stage II-IV (curative intent)</b>	Colonoscopy*	Colonoscopy		Colonoscopy			Colonoscopy	Colonoscopy
	Physical Exam, CBC, CMP, CEA, CT Chest/abd/pel w IV & Oral contrast	Physical Exam, CBC, CMP, CEA, CT Chest/abd/pel w IV & Oral contrast	Physical Exam, CBC, CMP, CEA, CT Chest/abd/pel w IV & Oral contrast	Physical Exam, CBC, CMP, CEA, CT Chest/abd/pel w IV & Oral contrast	Physical Exam, CBC, CMP, CXR			
<b>Stage IV non-curative</b>	FOLLOW-UP AS APPROPRIATE							

\*Patients who do not have a complete colonoscopy at time of diagnosis will require a complete colonoscopy at 6 months

All patients treated with curative intent will have their follow-up performed by the surgery department for the first 2 years and thereafter, whenever a colonoscopy is needed

Other follow-up will be performed by the patients PCP

- First degree family members should be identified to begin surveillance colonoscopy at the appropriate age. Please see Colon Cancer Screening Guidelines.
